EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claim 1 is allowable because the prior art of record does not disclose or reasonably suggest a term frequency calculation based on a lexical distance using a lexical dictionary in combination with a speech recognition engine and a natural language engine for generating two types of search predicates corresponding to logical operators and determining a final match using both semantic decoding and statistical based processing. Applicant's Specification, corresponding to U.S. Patent Publication No. 2004/0117189, ¶¶[0359] - ¶¶[0375], discloses a term frequency calculation and a semantic distance metric that employs interfacing with a lexical dictionary. The prior art of record does not disclose or reasonably suggest these limitations in combination with the features of a speech recognition engine and a natural language engine that determines a final match using both semantic decoding and statistical based processing, and two types of search predicates corresponding to logical operators.

Independent claims 22 and 35 are allowable because the prior art of record does not disclose or reasonably suggest semantic decoding based on a combined metric that includes term frequency, semantic coverage, and semantic distance using a lexical dictionary in combination with a speech recognition engine for generating two types of search predicates corresponding to logical operators for determining a final match. Applicant's Specification, corresponding to U.S. Patent Publication No. 2004/0117189, ¶¶[0359] - ¶¶[0375], discloses three metrics of term frequency, semantic coverage, and

semantic distance for computing a semantic match between user-articulated questions and stored semantic variants of the stored questions, where a composite metric is derived from the three metrics T, C, and W. Independent claims 22 and 35 are construed to require that all of the three metrics of term frequency, semantic coverage, and semantic distance are included in the combined metric calculation. The prior art of record does not disclose or reasonably suggest all of these three metrics in combination with the features of a speech recognition engine that determines a final match using two types of search predicates corresponding to logical operators.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
